Matt Edmonds

As society becomes progressively dominated by an ideology of healthy living, Matt Edmonds makes a vital critique of contemporary efforts to remove 'disability' from the world around us. Surveying the logic and language of both secular and religious health movements, Edmonds highlights the misplaced generalisations and dubious values that cumulatively serve to undermine individual inclusion and well-being on a day-to-day basis.

'A Theological Diagnosis' seeks a new direction. From the resources of Christian theology it finds a paradigm with which to examine the infections of genetic theory, faith healing and the meaning of 'disability' so as to prescribe a way forward for both believer and non-believer alike. Combining history, theology and thoughtful analysis, this is a prescription that none of us can afford to ignore. Quite simply, there is little time left.
