Aquaponic Gardening: A Step-By-Step Guide to Raising Vegetables and Fish Together Sylvia Bernstein

Aquaponics is a revolutionary system for growing plants by fertilizing them with the waste water from fish in a sustainable closed system. A combination of aquaculture and hydroponics, aquaponic gardening is an amazingly productive way to grow organic vegetables, greens, herbs, and fruits, while providing the added benefits of fresh fish as a safe, healthy source of protein. On a larger scale, it is a key solution to mitigating food insecurity, climate change, groundwater pollution, and the impacts of overfishing on our oceans. *Aquaponic Gardening* is the definitive do-it-yourself home manual, focused on giving you all the tools you need to create your own aquaponic system and enjoy healthy, safe, fresh, and delicious food all year round. Starting with an overview of the theory, benefits, and potential of aquaponics, the book goes on to explain:—System location considerations and hardware components—The living elements—fish, plants, bacteria, and worms—Putting it all together—starting and maintaining a healthy system. Aquaponics systems are completely organic. They are four to six times more productive and use ninety percent less water than conventional gardens. Other advantages include no weeds, fewer pests, and no watering, fertilizing, bending, digging, or heavy lifting—in fact, there really is no downside! Anyone interested in taking the next step towards self-sufficiency will be fascinated by this practical, accessible, and well-illustrated guide. **Sylvia Bernstein** is the president and founder of The Aquaponic Source. An internationally recognized expert on aquaponic gardening, Sylvia speaks, writes, and blogs extensively about this revolutionary technique.
