Chlamydia pneumoniae: Infection and Disease (Infectious Agents and Pathogenesis)

Chlamydia pneumoniae is a bacteria that is most commonly known for causing colds and pneumonia. However, researchers have recently found a link between **C. pneumoniae** and atherosclerosis, a clogging of the arteries that causes heart attack and stroke. In addition, ongoing research is showing that certain strains may play a role in asthma, multiple sclerosis, Alzheimer's disease, and arthritis.

This volume, part of the *Infectious Agents and Pathogenesis* series, is a complete portrait of **C. pneumoniae** and what is currently known about it.
