## Psychology of Learning and Motivation: 62

*Psychology of Learning and Motivation* publishes empirical and theoretical contributions in cognitive and experimental psychology, ranging from classical and instrumental conditioning to complex learning and problem solving. Each chapter thoughtfully integrates the writings of leading contributors, who present and discuss significant bodies of research relevant to their discipline. Volume 62 includes chapters on such varied topics as automatic logic and effortful beliefs, complex learning and development, bias detection and heuristics thinking, perceiving scale in real and virtual environments, using multidimensional encoding and retrieval contexts to enhance our understanding of source memory, causes and consequences of forgetting in thinking and remembering and people as contexts in conversation.

- Volume 62 of the highly regarded Psychology of Learning and Motivation series
- An essential reference for researchers and academics in cognitive science
- Relevant to both applied concerns and basic research
