## **Bronze Age Settlements in the Low Countries** Stijn Arnoldussen, Harry Fokkens

The Low Countries around the deltas of the river Rhine, Meuse and Scheldt have a long tradition in large scale archaeological research. This book brings together research from thirteen of the largest Bronze Age settlements described by their original excavators. These contributions are preceded by two introductory chapters written by the editors, providing a full overview of the state of Dutch Bronze Age settlement research, the key sites and the explanatory models current within it. Standards have been developed for the analysis of Bronze Age house plans and settlement sites and new models for the reading of the settled landscape. The rich data of the Low Countries also incorporate burial areas and deposition places. The findings presented can be seen to reflect the situation over a large area of lands bordering the North Sea.
