## Improvement of Forest Resources for Recyclable Forest Products

It is an honor and pleasure for me to write the foreword of this book comprising the proceedings of the Fourth Symposium on the Improvement of Forest Resources for Recyclable Forest Products. The symposium was organized by Dr. Toshihiro Ona, Associate Professor at the Graduate School of Bioresource and Bioenvironmental Sciences, Kyushu University, Japan, as part of the "Development of Forest Resources with High Performance for Paper Recycling" research project. This was supported by the Core Research for Evolutional Science and Technology (CREST) team at the Japan Science and Technology Agency Foundation (JST) and by Kyushu University. As a colleague of Dr. Ona, I commend his efforts in organizing the symposium and editing this book. In the forest, there is a multitude of resources, including trees, herbal plants, fruits, fungi, mammals, birds, insects, fishes, reptiles, water, landscapes, and tourist attractions. Nowadays, even the environment is regarded as a kind of forest resource. These resources can provide a diversity of forest products, such as timber for buildings, pulp and paper, charcoal, herbal medicines, wild vegetables, animal protein, edible mushrooms, and nonwoody fibers. From these resources, major forest products are produced using various species of trees. For example, softwood is suitable as building material, while hardwood is suitable for furniture production; pulp and paper are produced from both softwood and hardwood. Therefore, forest locations and forest management methods should vary according to the tree species used for production of different forest products.

### **From reader reviews:**

#### **Kathryn Richardson:**

What do you concerning book? It is not important together with you? Or just adding material when you require something to explain what the one you have problem? How about your time? Or are you busy man or woman? If you don't have spare time to try and do others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? Everyone has many questions above. They need to answer that question since just their can do that. It said that about publication. Book is familiar in each person. Yes, it is proper. Because start from on pre-school until university need this particular Improvement of Forest Resources for Recyclable Forest Products to read.

#### **Terrie Delgadillo:**

Nowadays reading books are more than want or need but also work as a life style. This reading routine give you lot of advantages. The huge benefits you got of course the knowledge your information inside the book this improve your knowledge and information. The information you get based on what kind of reserve you read, if you want get more knowledge just go with knowledge books but if you want sense happy read one together with theme for entertaining for instance comic or novel. The Improvement of Forest Resources for Recyclable Forest Products is kind of e-book which is giving the reader erratic experience.

#### **Deanna Jackson:**

The book Improvement of Forest Resources for Recyclable Forest Products will bring that you the new experience of reading a book. The author style to elucidate the idea is very unique. When you try to find new book to see, this book very suited to you. The book Improvement of Forest Resources for Recyclable Forest Products is much recommended to you to learn. You can also get the e-book from official web site, so you can quickly to read the book.

#### **Frank Godwin:**

Don't be worry in case you are afraid that this book will probably filled the space in your house, you could have it in e-book method, more simple and reachable. This kind of Improvement of Forest Resources for Recyclable Forest Products can give you a lot of buddies because by you investigating this one book you have issue that they don't and make you more like an interesting person. That book can be one of a step for you to get success. This reserve offer you information that might be your friend doesn't learn, by knowing more than additional make you to be great men and women. So , why hesitate? Let us have Improvement of Forest Resources for Recyclable Forest Products.
