This interdisciplinary textbook encompasses all clinically relevant aspects of the disease and is designed to be as user-friendly as possible in order to meet the needs of the busy practitioner. To this end, the informative text is complemented by helpful boxed sections that present essential 'take home' points and illustrative patient-oriented cases. Original high-quality images, some in color, are included whenever necessary to simplify particularly complex material. The authors are an international group of acknowledged experts in kidney cancer epidemiology, molecular biology, pathology, diagnosis, clinical features, staging, prognostic and predictive factors, surgery, systemic therapy, and emerging investigational approaches, among others. This clinically oriented volume will be of great interest to clinicians, researchers, residents, and fellows, as well as to students and knowledgeable lay people.
