## Molecular Biology of the Parathyroid (Molecular Biology Intelligence Unit)

Maintaining extracellular calcium concentrations within a narrow range is critical for the survival of most vertebrates. PTH, together with vitamin D, responds to hypocalcemia to increase extracellular calcium levels, by acting on bone, kidney and intestine. The recent introduction of PTH as a major therapeutic agent in osteoporosis has directed renewed interest in this important hormone and in the physiology of the parathyroid gland. The parathyroid is unique in that low serum calcium stimulates PTH secretion. As hypocalcemia persists, there is also an increase in PTH synthesis. Chronic hypocalcemia leads to hypertrophy and hyperplasia of the parathyroid gland together with increased production of the hormone. Phosphate is also a key modulator of PTH secretion, gene expression and parathyroid cell proliferation. Understanding the biology of the parathyroid as well as the mechanisms of associated diseases has taken great strides in recent years. This book summarizes the molecular mechanisms involved in the function of the parathyroid gland. The first chapter reviews the development of the parathyroid gland and the genes involved in this process as identified using genetically manipulated mice. Then the biosynthetic pathway of PTH from gene expression to its intracellular processing and the sequences in the gene controlling its transcription as well as those regulating mRNA processing, stability and translation are described.

#### **David Tillery:**

Book is to be different for every single grade. Book for children until adult are different content. As we know that book is very important for people. The book Molecular Biology of the Parathyroid (Molecular Biology Intelligence Unit) was making you to know about other expertise and of course you can take more information. It is rather advantages for you. The reserve Molecular Biology of the Parathyroid (Molecular Biology Intelligence Unit) is not only giving you more new information but also to get your friend when you feel bored. You can spend your personal spend time to read your guide. Try to make relationship with all the book Molecular Biology of the Parathyroid (Molecular Biology Intelligence Unit). You never sense lose out for everything if you read some books.

#### **Joel Connolly:**

Hey guys, do you really wants to finds a new book you just read? May be the book with the subject Molecular Biology of the Parathyroid (Molecular Biology Intelligence Unit) suitable to you? Typically the book was written by renowned writer in this era. The particular book untitled Molecular Biology of the Parathyroid (Molecular Biology Intelligence Unit)is the main one of several books which everyone read now. This book was inspired a lot of people in the world. When you read this reserve you will enter the new age that you ever know before. The author explained their thought in the simple way, so all of people can easily to know the core of this book. This book will give you a lot of information about this world now. So you can see the represented of the world within this book.

#### **Michael Rodriguez:**

The book Molecular Biology of the Parathyroid (Molecular Biology Intelligence Unit) will bring you to definitely the new experience of reading some sort of book. The author style to explain the idea is very unique. If you try to find new book to read, this book very suitable to you. The book Molecular Biology of the Parathyroid (Molecular Biology Intelligence Unit) is much recommended to you to study. You can also get the e-book from the official web site, so you can quicker to read the book.

#### **David Packard:**

Reading a book for being new life style in this yr; every people loves to go through a book. When you go through a book you can get a great deal of benefit.
