Regulating Public Procurement, National and International Perspectives

Sue Arrowsmith, John Linarelli, Don Wallace Jr.

Regulating Public Procurement, National and International Perspectives Sue Arrowsmith, John Linarelli, Don Wallace Jr.

Because of its enormous economic power and susceptibility to corruption, public procurement--the purchase by government of goods and services--has come under increasing regulation as world trade expands. Spurred on by domestic policies, trade agreements, and international organizations such as the World Bank, a new international system to regulate this strategic economic force is rapidly evolving--a system this is the first book to explore and elucidate.

recognise circumstances under which discretion-based (rather than rules-based) initiatives may be more effective. Drawing on their extensive experience and expertise, the authors clarify the important distinctions between the realities of public procurement in industrialized, developing, and transitioning economies.

Throughout the book the reader will find detailed practical examples and important texts, including significant public procurement decisions of courts and other tribunals; resolutions of various national and international councils; and pertinent excerpts from legal commentators.
