Eden's Garden: Rethinking Sin and Evil in an Era of Scientific Promise Richard J. Coleman

In *Eden's Garden: Rethinking Sin and Evil in an Era of Scientific Promise*, Richard Coleman examines the notion of sin in a contemporary world that values scientific and nonreligious modes of thought regarding human behavior. This work is not an anti-science polemic, but rather an argument to show how sin and evil can make sense to the nonreligious mind, and how it is valuable to make sense of such phenomena.

Examining themes in religion, philosophy, and theology, it is ideal for use in the numerous courses which move across these disciplines.
