**Managing Environments for Leisure and Recreation (Routledge Environmental Management)** Richard Broadhurst

Can we balance the needs of the host, the environment and the visitor?

Most people live for their leisure, recreation and travel opportunities. *Managing Environments for Leisure and Recreation* seeks to bring together the different strands of thought that inform the management of settings, for leisure and recreation. The text shows how a positive difference can be made to such activities, by taking a balanced approach in managing for the environment and for people, both now, and into the future.

*Managing Environments for Leisure and Recreation* urges managers to balance the need for a systematic approach, with the need for a systemic development of an environmental management ethic. It is highly illustrated with over 50 line drawings and includes many case studies from around the world.
