Darwinian Heresies

Darwinian Heresies

In Darwinian Heresies, which was originally published in 2004, prominent historians and philosophers of science trace the history of evolutionary thought, and challenge many of the assumptions that have built up over the years. Covering a wide range of issues starting in the eighteenth century, Darwinian Heresies brings us through the time of Charles Darwin and the *Origin*, and then through the twentieth century to the present. It is suggested that Darwin's true roots lie in Germany, not his native England, that Russian evolutionism is more significant than many are prepared to allow, and that the true influence on twentieth-century evolution biology was not Charles Darwin at all, but his often-despised contemporary, Herbert Spencer. The collection was intended to interest, to excite, to infuriate, and to stimulate further work.
