## How to STEM: Science, Technology, Engineering, and Math Education in Libraries

During the past few years, groups like the President's Council of Advisors on Science and Technology, Center for Education have been placing great emphasis on the significance of STEM (science, technology, engineering, and math) education. In brief, the US is seen as falling behind the rest of the world in science and technology education. In response, the curricula have been revised in many educational institutions and school districts across the country. It is clear that for STEM to be successful, other community organizations, most particularly libraries, need to be closely involved in the process. Library staff realize the importance of getting involved in STEM education, but many have difficulty finding comprehensive information that will help them plan and successfully implement STEM direction in their organization. This book is designed to meet that need. It is timely and relevant. *How to STEM: Science, Technology, Engineering, and Math Education in Libraries* is by and for libraries who are involved in contributing efforts into advancing these subjects. It is organized in 9 parts including funding, grant writing, community partnerships, outreach, research, and examples of specific programming activities. Authors are drawn from the professional staffs of educational institutions, libraries, and non-profit organizations such as science museums.

The book contains eight parts, each emphasizing a different aspect of how to succeed with STEM. Part 1 emphasizes how hands-on activities that are both fun and educational can be used to further STEM awareness. Parts 2 and 3 contain chapters on the uniting of STEM with Information Literacy. Innovative collection development ideas are discussed in Part 4 and Part 5 focuses on research and publishing. Outreach is the theme of Part 6 and the programs described in these chapters offer an array of ways to connect with students of all ages. The final section of *How to STEM: Science, Technology, Engineering, and Math Education in Libraries* addresses the funding of these programs.

Librarians of all types will be pleased to discover easy-to-implement suggestions for collaborative efforts, many rich and diverse programming ideas, strategies for improving reference services and library instruction to speakers of English as a second language, marketing and promotional tips designed to welcome multicultural patrons into the library, and much more.

### **From reader reviews:**

#### **Carlos Pollard:**

The book How to STEM: Science, Technology, Engineering, and Math Education in Libraries gives you the sense of being enjoy for your spare time. You need to use to make your capable considerably more increase. Book can to be your best friend when you getting pressure or having big problem with your subject. If you can make reading a book How to STEM: Science, Technology, Engineering, and Math Education in Libraries to become your habit, you can get considerably more advantages, like add your current capable, increase your knowledge about a number of or all subjects. You could know everything if you like open up and read a e-book How to STEM: Science, Technology, Engineering, and Math Education in Libraries. Kinds of book are a lot of. It means that, science guide or encyclopedia or some others. So , how do you think about this publication?

#### **Lisa Lee:**

What do you ponder on book? It is just for students since they're still students or the idea for all people in the world, the particular best subject for that? Simply you can be answered for that issue above. Every person has different personality and hobby for each other. Don't to be pressured someone or something that they don't wish do that. You must know how great as well as important the book How to STEM: Science, Technology, Engineering, and Math Education in Libraries. All type of book would you see on many solutions. You can look for the internet sources or other social media.

#### **Blake Westerman:**

Playing with family in a park, coming to see the marine world or hanging out with good friends is thing that usually you might have done when you have spare time, and then why you don't try thing that really opposite from that. Just one activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition info. Even you love How to STEM: Science, Technology, Engineering, and Math Education in Libraries, you could enjoy both. It is excellent combination right, you still desire to miss it? What kind of hang type is it? Oh can happen its mind hangout folks. What? Still don't obtain it, oh come on its referred to as reading friends.

#### **Edward Donnelly:**

Your reading 6th sense will not betray anyone, why because this How to STEM: Science, Technology, Engineering, and Math Education in Libraries publication written by well-known writer who knows well how to make book that may be understand by anyone who else read the book. Written inside good manner for you, still dripping wet every ideas and writing skill only for eliminate your hunger then you still uncertainty How to STEM: Science, Technology, Engineering, and Math Education in Libraries as good book not merely by the cover but also by content. This is one e-book that can break don't ascertain book by its handle, so do you still needing one more sixth sense to pick this specific!? Oh come on your examining

sixth sense already said so why you have to listening to yet another sixth sense.
