Handbook of Image and Video Processing (Communications, Networking and Multimedia)

Alan C. Bovik

Handbook of Image and Video Processing (Communications, Networking and Multimedia) Alan C. Bovik

55% new material in the latest edition of this “must-have” for students and practitioners of image & video processing!

This Handbook is intended to serve as the basic reference point on image and video processing, in the field, in the research laboratory, and in the classroom. Each chapter has been written by carefully selected, distinguished experts specializing in that topic and carefully reviewed by the Editor, Al Bovik, ensuring that the greatest depth of understanding be communicated to the reader. Coverage includes introductory, intermediate and advanced topics and as such, this book serves equally well as classroom textbook as reference resource.

- Provides practicing engineers and students with a highly accessible resource for learning and using image/video processing theory and algorithms
- Includes a new chapter on image processing education, which should prove invaluable for those developing or modifying their curricula
- Covers the various image and video processing standards that exist and are emerging, driving today's explosive industry
- Offers an understanding of what images are, how they are modeled, and gives an introduction to how they are perceived
- Introduces the necessary, practical background to allow engineering students to acquire and process their own digital image or video data
- Culminates with a diverse set of applications chapters, covered in sufficient depth to serve as extensible models to the reader's own potential applications

About the Editor...

Al Bovik is the Cullen Trust for Higher Education Endowed Professor at The University of Texas at Austin, where he is the Director of the Laboratory for Image and Video Engineering (LIVE). He has published over 400 technical articles in the general area of image and video processing and holds two U.S. patents. Dr. Bovik was Distinguished Lecturer of the IEEE Signal Processing Society (2000), received the IEEE Signal Processing Society Meritorious Service Award (1998), the IEEE Third Millennium Medal (2000), and twice was a two-time Honorable Mention winner of the international Pattern Recognition Society Award. He is a Fellow of the IEEE, was Editor-in-Chief, of the IEEE Transactions on Image Processing (1996-2002), has served on and continues to serve on many other professional boards and panels, and was the Founding General Chairman of the IEEE International Conference on Image Processing which was held in Austin, Texas in 1994.

* No other resource for image and video processing contains the same breadth of up-to-date coverage

* Each chapter written by one or several of the top experts working in that area

* Includes all essential mathematics, techniques, and algorithms for every type of image and video processing used by electrical engineers, computer scientists, internet developers, bioengineers, and scientists in various,

image-intensive disciplines

From reader reviews:

Danny Exum:

Why don't make it to be your habit? Right now, try to prepare your time to do the important act, like looking for your favorite guide and reading a reserve. Beside you can solve your condition; you can add your knowledge by the publication entitled Handbook of Image and Video Processing (Communications, Networking and Multimedia). Try to face the book Handbook of Image and Video Processing (Communications, Networking and Multimedia) as your friend. It means that it can to be your friend when you truly feel alone and beside that course make you smarter than ever. Yeah, it is very fortuned for you personally. The book makes you a lot more confidence because you can know anything by the book. So , let's make new experience in addition to knowledge with this book.

Norman Brown:

What do you with regards to book? It is not important along? Or just adding material if you want something to explain what your own problem? How about your free time? Or are you busy particular person? If you don't have spare time to try and do others business, it is give you a sense of feeling bored faster. And you have extra time? What did you do? Every individual has many questions above. They have to answer that question simply because just their can do that will. It said that about e-book. Book is familiar on every person. Yes, it is proper. Because start from on kindergarten until university need that Handbook of Image and Video Processing (Communications, Networking and Multimedia) to read.

Betty Giuliani:

Are you kind of active person, only have 10 or maybe 15 minute in your day time to upgrading your mind proficiency or thinking skill actually analytical thinking? Then you have problem with the book in comparison with can satisfy your short period of time to read it because all of this time you only find book that need more time to be go through. Handbook of Image and Video Processing (Communications, Networking and Multimedia) can be your answer given it can be read by a person who have those short free time problems.

Casey Timmons:

In this time globalization it is important to someone to get information. The information will make someone to understand the condition of the world. The condition of the world makes the information quicker to share. You can find a lot of personal references to get information example: internet, magazine, book, and soon. You will observe that now, a lot of publisher which print many kinds of book. Typically the book that recommended for you is Handbook of Image and Video Processing (Communications, Networking and Multimedia) this guide consist a lot of the information with the condition of this world now. This book was represented how can the world has grown up. The terminology styles that writer require to explain it is easy to understand. Often the writer made some investigation when he makes this book. Honestly, that is why this

book ideal all of you.
