Homolytic Aromatic Substitution: International Series of Monographs on Organic Chemistry G. H. Williams

Homolytic Aromatic Substitution deals with the theoretical aspects of homolytic aromatic substitution reactions. The effect of various kinds of free radicals on the substitution of atoms or groups (usually hydrogen) attached to aromatic nuclei is examined, and the preparative use of homolytic substitution reactions is also considered.

This book is comprised of seven chapters and begins with an introduction to the general characteristics of homolysis, along with homolytic and heterolytic aromatic substitution. The discussion then turns to the various theoretical approaches used to rationalize aromatic substitution, particularly those that are germane to a consideration of the problems of orientation and reactivity in homolytic substitution. The following chapters explore homolytic arylation reactions, including those between aryl radicals and aromatic substrates; relative rates of arylation and partial rate factors for phenylation; the reaction mechanism underlying intramolecular arylation; and homolytic alkylation reactions. The final chapter deals with hydroxylation and some other substitution reactions such as benzyloxylation, acetyloxylation, halogenation, amination and amidation, and mercuration.

This monograph will be of interest to organic chemists.

From reader reviews:

Kenneth Hill:

What do you consider book? It is just for students since they're still students or the item for all people in the world, what best subject for that? Simply you can be answered for that problem above. Every person has diverse personality and hobby for each other. Don't to be forced someone or something that they don't wish do that. You must know how great along with important the book Homolytic Aromatic Substitution: International Series of Monographs on Organic Chemistry. All type of book could you see on many options. You can look for the internet sources or other social media.

Renee Wood:

As people who live in typically the modest era should be update about what going on or info even knowledge to make them keep up with the era and that is always change and make progress. Some of you maybe will probably update themselves by looking at books. It is a good choice to suit your needs but the problems coming to you actually is you don't know what kind you should start with. This Homolytic Aromatic Substitution: International Series of Monographs on Organic Chemistry is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and need in this era.

Rita Beatty:

A lot of people always spent their free time to vacation or go to the outside with them friends and family or their friend. Were you aware?
