How regions and cities adapt to a Network Society and a globalized environment, the policies they pursue and how structures of governance are transformed in the pursuit of those policies are major themes in this volume. These issues are addressed with specific reference to the Nordic regions of Europe. Covering the four Nordic countries of Denmark, Finland, Norway, and Sweden plus the Faroe Islands, this volume charts the changes in networking activities and related development initiatives that have taken place over the last ten years. This means analysing regions in their pursuit of new policies, partnerships and styles of representation. Through this process regions are becoming partners and players in European integration and a movement of integrative regionalism is taking shape which is different from inward looking identity regionalism or self-centred competitive regionalism and takes regions beyond lobbying in Brussels.
