Pre-commission Cleaning of Pipework Systems

C. J. Parsloe

Pre-commission Cleaning of Pipework Systems C. J. Parsloe

Written for system designers and installers, this title presents an updated revision to "BSRIA Application Guide, AG 8/91 - Pre-Commission Cleaning of Water Systems", which is intended to be both an information source and a statement of the minimum requirements for effective system cleaning. It sets out a comprehensive procedure for pre-commission cleaning, incorporating new recommendations and procedures to help combat the growing incidence of bacteria-related contamination in closed systems which have become more common during the 1990s. The guide is intended for recirculating heating and cooling systems and does not apply to hot and cold water supplies and deals with the topic under the headings: design considerations, installation considerations, system dynamic flushing, and chemical cleaning procedure.
