Bayesian Adaptive Methods for Clinical Trials (Chapman & Hall/CRC Biostatistics Series) Scott M. Berry, Bradley P. Carlin, J. Jack Lee, Peter Muller

Already popular in the analysis of medical device trials, adaptive Bayesian designs are increasingly being used in drug development for a wide variety of diseases and conditions, from Alzheimer's disease and multiple sclerosis to obesity, diabetes, hepatitis C, and HIV. Written by leading pioneers of Bayesian clinical trial designs, **Bayesian Adaptive Methods for Clinical Trials** explores the growing role of Bayesian thinking in the rapidly changing world of clinical trial analysis.

The book first summarizes the current state of clinical trial design and analysis and introduces the main ideas and potential benefits of a Bayesian alternative. It then gives an overview of basic Bayesian methodological and computational tools needed for Bayesian clinical trials. With a focus on Bayesian designs that achieve good power and Type I error, the next chapters present Bayesian tools useful in early (Phase I) and middle (Phase II) clinical trials as well as two recent Bayesian adaptive Phase II studies: the BATTLE and ISPY-2 trials. In the following chapter on late (Phase III) studies, the authors emphasize modern adaptive methods and seamless Phase II–III trials for maximizing information usage and minimizing trial duration. They also describe a case study of a recently approved medical device to treat atrial fibrillation. The concluding chapter covers key special topics, such as the proper use of historical data, equivalence studies, and subgroup analysis.

For readers involved in clinical trials research, this book significantly updates and expands their statistical toolkits. The authors provide many detailed examples drawing on real data sets. The R and WinBUGS codes used throughout are available on supporting websites.

Scott Berry talks about the book on the CRC Press YouTube Channel.

From reader reviews:

Curtis Dugan:

A lot of people always spent their particular free time to vacation or go to the outside with them family or their friend. Do you know? Many a lot of people spent they free time just watching TV, or playing video games all day long. In order to try to find a new activity that is look different you can read some sort of book. It is really fun for yourself. If you enjoy the book that you simply read you can spent all day long to reading a guide. The book Bayesian Adaptive Methods for Clinical Trials (Chapman & Hall/CRC Biostatistics Series) it is extremely good to read. There are a lot of individuals who recommended this book. They were enjoying reading this book. Should you did not have enough space to bring this book you can buy often the e-book. You can m0ore very easily to read this book through your smart phone. The price is not too costly but this book features high quality.

Elisabeth Martinez:

Bayesian Adaptive Methods for Clinical Trials (Chapman & Hall/CRC Biostatistics Series) can be one of your basic books that are good idea. Most of us recommend that straight away because this book has good vocabulary that can increase your knowledge in words, easy to understand, bit entertaining but nevertheless delivering the information. The article writer giving his/her effort to place every word into joy arrangement in writing Bayesian Adaptive Methods for Clinical Trials (Chapman & Hall/CRC Biostatistics Series) nevertheless doesn't forget the main level, giving the reader the hottest as well as based confirm resource info that maybe you can be certainly one of it. This great information can drawn you into new stage of crucial pondering.

Lionel Gutierrez:

Reading a book to become new life style in this year; every people loves to examine a book. When you learn a book you can get a lot of benefit. When you read ebooks, you can improve your knowledge, because book has a lot of information upon it. The information that you will get depend on what kinds of book that you have read. If you would like get information about your review, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, this kind of us novel, comics, in addition to soon. The Bayesian Adaptive Methods for Clinical Trials (Chapman & Hall/CRC Biostatistics Series) provide you with a new experience in examining a book.

Michael Kenney:

As we know that book is essential thing to add our information for everything. By a reserve we can know everything we would like. A book is a set of written, printed, illustrated or even blank sheet. Every year ended up being exactly added. This publication Bayesian Adaptive Methods for Clinical Trials (Chapman & Hall/CRC Biostatistics Series) was filled concerning science. Spend your free time to add your knowledge about your science competence. Some people has distinct feel when they reading some sort of book. If you

know how big good thing about a book, you can feel enjoy to read a reserve. In the modern era like currently, many ways to get book that you simply wanted.
